

CORPORATE OVERVIEW

Rely On the All-Gen Leader in Core Wireless Solutions

For extremely robust, reliable technology solutions, you can count on Interop Technologies. We are the new-generation, leading-edge provider of core messaging, device management, and connectivity gateway solutions to the global telecom industry. Our high-performance solutions power SMS, MMS, short code, mobile Internet access (WAP), and device management services delivered to millions of wireless customers every day.

➤ PROFIT FROM OUR UNIQUE APPROACH

Our modular, distributed architecture provides massive scalability to support today's high-volume demand and is future-proof to support tomorrow's technologies and networks.

**design. build.
host. support.
...all in-house.**

We design, build, and host our own technologies, providing our seasoned engineers with knowledge that can only come from running our own solutions in-network. As a result, you benefit from highly responsive and efficient support as well as operator-grade "five-nines" (99.999 percent) reliability.

We offer flexible hosted and turnkey deployment options, and Interop Technologies enables you to migrate easily from hosted to turnkey as your business needs change—without changing technology platforms and risking service disruption.

We are the only provider that makes billing so simple. Our single, unified billing feed flexibly integrates with your current billing platform and supports all our solutions. Set it up once and you're done. Add as many of our technology solutions as you choose and leverage the same feed.

Our flexible technology, deployment, and billing approaches provide a sustainable competitive edge to help your business thrive.

➤ BENEFIT FROM OUR EXPERIENCE

Interop Technologies' founders are wireless industry pioneers. Our leadership team has decades of background as wireless operators and vendors. We understand what you experience every day because we have not only been there—but continue to be there. Because we run our own solutions in-network, we constantly seek ways to improve our solutions and the systems on which they run.

START YOUR NEXT-GEN EVOLUTION

We provide flexible, affordable, "All-Gen" solutions that work exceptionally well with your legacy infrastructure and fit your technology roadmap for the future. All of our messaging solutions support both legacy and IP-based technologies simultaneously, allowing for the deployment of next-gen technologies while maintaining seamless operation and services for legacy handsets and networks.

With the experience of real-world deployments, Interop Technologies is uniquely positioned as the thought leader in IP messaging. In our trials and commercial deployments, we have gained valuable experience to share with operators that are planning their 4G messaging strategies and analyzing the challenges ahead.

ALL
Gen
all the time

➤ JOIN OUR SATISFIED CUSTOMERS

Interop Technologies is a trusted partner to operators of all sizes. Since we started Interop in 2002, our satisfied customers have helped us grow rapidly with repeat business and referrals. Our company is headquartered in Fort Myers, FL, with facilities in Dallas, TX, and São Paulo, Brazil.

While other vendors are retrenching, we are profitable and financially sound, expanding and actively planning additional growth worldwide.

➤ MASSIVE SCALE

Interop Technologies solves your volume problems with unlimited scalability. We use the latest in parallel processing and load-balancing techniques to provide more than enough speed and capacity—now and in years to come.

➤ FLEXIBLE DEPLOYMENTS

Choose the deployment that suits your business conditions:

- **Hosted**—Share technology in a service bureau environment.
- **Modified Hosted**—Deploy our solutions at your site without capital expense; we manage them for you.
- **Turnkey**—Purchase our solutions outright for on-site deployment.
- **Turnkey with Managed Services**—Purchase our solutions outright; we handle operations and management.

You will get the same technology solutions with all four options. Plus, we can customize the modified hosted and turnkey deployments for your specific applications.

➤ PROVEN PARTNER

Interop Technologies has a proven track record and is a trusted business partner. We are well-positioned to support the next generation of wireless technologies and customers.

SIMPLE MIGRATION

WE'LL HOST UNTIL YOU'RE READY TO BUY AND MANAGE OUR TURNKEY SOLUTIONS

Don't allow resource constraints and evolving business environments dictate your long-term strategy.

Unlike other hosting companies, which can only provide long-term hosted solutions using another company's technology, we can easily migrate your services from our hosted to turnkey solutions. Should your business needs change and you decide to migrate, we help you make the transition smoothly and quickly.

The technology is exactly the same for hosted and turnkey. Common interfaces for users, customer care, billing, and reporting simplify the migration process. With other providers, disruption occurs from switching technologies, vendors, and tools, often just as services become a critical part of your business.

Interop Technologies is the only provider offering a simple migration path from hosted to turnkey. No other company provides so much deployment flexibility.
