

HOSTED SOLUTIONS

Match Deployments to Changing Business Needs

Take all-generation messaging and device management services to market now. Save money and migrate to turnkey if and when your business requires a different strategy.

Interop Technologies, the new-generation, leading-edge provider of core wireless solutions, delivers adaptable technologies today, built for tomorrow. Our hosted messaging, device management, and connectivity gateway solutions offer future-proof, highly scalable, and reliable technology. Rapidly deploy the technologies and capacity you need when you need it—without the capital expense of turnkey equipment.

➤ CHOOSE FROM INTEROP TECHNOLOGIES SOLUTIONS

Interop Technologies solutions meet all of your messaging, device management, and connectivity gateway needs:

- Short Message Service Center (SMSC) 4 Series
- 4G Messaging Gateway
- Multimedia Message Service Center (MMSC)
- WAP Gateway
- Common Short Code (CSC) Gateway
- SCOPE™ Device Management Solution
- CDMA OTA Provisioning

staying
current is key

New software releases and continuous enhancements, such as next-generation IP technology, are yours at no additional charge. Now you can deploy solutions fast to fit your market need—regardless of timeline, network size, technical expertise, human resources, business model, or budget. Interop Technologies can make it happen.

Interop internally maintains complete control of the entire development, testing, hosting, and support process. As former network operators, Interop executives know how important innovation, quality, and affordability are to you. Let us prove it.

MANAGE ALL SOLUTIONS RISK-FREE

Hosting with Interop Technologies is risk-free. When you're ready to launch new services, we get you up and running quickly—and manage the solutions for you. Since Interop Technologies builds the solutions we host, we know first-hand how to anticipate capacity needs and meet usage spikes as they occur. In addition, you automatically receive all development advancements and software upgrades. For extra assurance, Interop Technologies provides around-the-clock monitoring of your solutions. With Interop Technologies, you benefit from always being on the "leading edge."

We offer a simple migration path between deployments, ensuring your business needs are always met with the most appropriate deployment for your strategy. Change deployments quickly—or never. There's no hurry, and the choice is yours.

No risk
no worry
no hurry

➤ EXPERIENCE AFFORDABLE EXCELLENCE

We are completely focused on messaging, device management, and connectivity gateways.

Using the latest concepts in technology and architecture, we design and build our own solutions—the same technology we host. You get affordable technical excellence and unmatched performance for your company and your customers. With Interop Technologies, you will have a competitive edge for years to come.

Interop Technologies hosted solutions provide “five-nines” (99.999 percent) reliability. Hosted solutions are offered from geographically diverse network operations centers and powered by the same state-of-the-art technology we provide to our turnkey customers.

➤ SUPPLEMENT CAPACITY WITH HOSTED

Select our hosted deployment to increase your existing capacity and ease human resource constraints—without additional capital expenditures. Our seasoned engineers manage your technology based on knowledge gained by running our own solutions in-network. As a result, you receive reliable support—and can solve capacity problems without staffing up.

➤ DISASTER-PROOF YOUR SERVICES

For added assurance, all our hosted solutions are fully geo-redundant, which is essential for the core services Interop Technologies provides. Interop Technologies’ hosted solutions provide the overflow services you need. Our secure network operations centers in Dallas, TX, and Fort Myers, FL, are staffed around the clock.

➤ DEPLOY FOUR WAYS

Unlike other hosting companies that can only provide long-term hosted solutions using another company’s technology, we can easily migrate your services from our hosted to modified hosted or turnkey solutions. Interop Technologies offers several alternative deployments:

- **Modified Hosted**—Deploy our solutions at your site without capital expense; we manage them for you.
- **Turnkey**—Purchase our solutions outright for on-site deployment.
- **Turnkey with Managed Services**—Purchase our solutions outright; we handle operations and management.

All four options include our world-class technology, and our architecture enables easy migration from hosted to turnkey if and when your business requires a different strategy.

KEY BENEFITS

SIMPLIFY BILLING WITH A UNIFIED FEED

Interop Technologies helps protect your revenue flow with a single, unified billing feed. Our highly efficient feed flexibly integrates with your current billing platform. Set it up once and you’re done. Then add as many of our technology solutions as you choose and leverage the same feed. We do the work, and you can quickly and easily launch and manage new competitive services.

SAVE MONEY WITH GLOBAL HOSTING

Distance is no obstacle to value. We use the latest in connectivity to deliver all our solutions over IP around the globe with reliable, cost-effective transport.
