

## CORPORATE & TECHNOLOGY OVERVIEW

### Rely On the “All-Gen” Leader in Core Wireless Solutions

Whether you’re already moving toward all-IP-based technology or you’re somewhere in between legacy and next-gen, Interop Technologies has you covered. All of our solutions enable you to capitalize on the world’s most advanced technologies today while meeting your unique operational needs.

Interop Technologies is the next-generation, leading-edge provider of core messaging, mobile device management, and connectivity gateway solutions to the global telecom and broadband industry. Our high-performance, highly scalable solutions power SMS, MMS, short code, mobile Internet access, OTA provisioning services, and device management services delivered to millions of wireless customers every day. All of our solutions are designed and built in-house, and our engineers are armed with knowledge that only comes from running our own solutions in a real-time live traffic production environment.

#### ➤ CHOOSE FROM INTEROP TECHNOLOGIES SOLUTIONS

Interop Technologies implements all of its highly scalable, reliable solutions to meet your current—and evolving—technology needs.

- Short Message Service Center (SMSC) 4 Series
- Messaging Personalization and Control (MPAC) Services
- IP Messaging Gateway
- Multimedia Message Service Center (MMSC)
- WAP Gateway
- Common Short Code (CSC) Gateway
- SCOPE™ Device Management Solution
- CDMA OTA Provisioning

#### ➤ START YOUR NEXT-GEN EVOLUTION

the “all-gen”  
advantage

We provide flexible, affordable, “all-gen” solutions that work exceptionally well with your legacy infrastructure and fit your technology roadmap for the future. All of our core solutions support both legacy and IP-based technologies simultaneously, allowing for the deployment of next-gen technologies while maintaining seamless operation and services for legacy handsets and networks.

#### CHOOSE FROM FOUR DEPLOYMENT OPTIONS

Interop Technologies offers four flexible deployment options:

**Hosted**—Share technology in a service bureau environment.

**Modified Hosted**—Deploy our solution at your site without capital expense; we manage it for you.

**Turnkey**—Purchase our solution outright for on-site deployment.

**Turnkey with Managed Services**—Purchase our solution outright; we handle operations and management.

All four options include our world-class technology, and our architecture enables easy migration from hosted to turnkey if and when your business requires a different strategy.

ways  
to  
deploy

With the experience of real-world deployments, Interop Technologies is uniquely positioned as the thought leader in IP messaging. In our trials and commercial deployments, we have gained valuable experience to share with operators that are planning their IP strategies and analyzing the challenges ahead.

### ➤ RAPIDLY DEPLOY SERVICES AND CAPACITY WHEN YOU NEED IT

Interop Technologies helps you take all-generation messaging and mobile device management services to market now with our hosted deployment option. Then, if and when your business requires a different strategy, we make it simple to migrate to our turnkey solutions—without changing technology platforms and risking service disruption.

With our hosted solutions, software updates are yours at no additional charge. Now you can deploy solutions fast to fit your market need—regardless of timeline, network size, technical expertise, human resources, business model, or budget.

### ➤ SHARED SOLUTION BENEFITS

When you bundle Interop Technologies solutions, you benefit from a Web-based Control Center that lets you easily manage all of your Interop solutions from one central location. Through the Control Center, you can access our comprehensive reporting tool set, which enables you to gain valuable business intelligence for future network and operations planning. In addition, a subscriber provisioning API enables you to easily provision and de-provision subscriber numbers and update subscriber services, increasing efficiency and saving you time and money. Our single, unified billing feed (real-time and CDR supported) integrates with your current billing platform and supports all of your solutions, making it easy to implement new revenue-generating services.

### ➤ PROFIT FROM OUR UNIQUE APPROACH

Our modular, distributed architecture provides massive scalability to support today's high-volume demand and is "future-proof" to support tomorrow's technologies and networks. With complete IP compliance and readiness, your migration to next-generation messaging is simple.

We design, build, and host our own technologies, providing our seasoned engineers with knowledge that can only come from running our own solutions in a real-time live traffic production environment. Interop internally maintains complete control of the entire development, testing, hosting, and support process. As a result, you benefit from highly responsive and efficient support as well as operator-grade "five-nines" (99.999 percent) reliability.

## CORPORATE FACTS

### **BENEFIT FROM OUR EXPERIENCE**

Interop Technologies' founders are wireless industry pioneers. Our leadership team has decades of experience as wireless operators and vendors. We understand what you experience every day because we have not only been there—but continue to be there. Because we run our own solutions in-network, we constantly seek ways to improve our solutions and the systems on which they run.

### **JOIN OUR SATISFIED CUSTOMERS**

Interop Technologies is a trusted partner to operators of all sizes. Since we started Interop in 2002, our satisfied customers have helped us grow rapidly with repeat business and referrals. Our company is headquartered in Fort Myers, FL, with geo-redundant NOC facilities in Dallas, TX, and Fort Myers, FL, and offices in Hong Kong.

### **A PROVEN PARTNER**

Interop Technologies has a proven track record and is a trusted business partner. We are well-positioned to support the next generation of core technologies whether in the wireless, broadband, or traditional telecommunication space.
